PRESCOTT

MODULE COMPANY LTD.

Prescott Module Company Ltd. was founded in 1961 by Nick Steiner and Yvon Dauth, two engineers sensitive to the demands of the Electronics Industry.

In its early stages, Prescott introduced a line of Thermoset thin wall cases to accommodate space requirements to house small components. As the market developed, Prescott featured the capability of fulfilling an evident need to guarantee consistent case and cover fit.

Prescott's long term goal was to become a dependable packaging expert in the Electronics Industry and to carry this expertise into other markets. This was accomplished by expanding to include the manufacture of parts in Thermoplastic, Metal and Laminates. Custom Design became a by-product for special shapes and projects ranging from bobbins to connectors, with the interesting and exciting advantage of combining two or more technologies.

Prescott has grown from a "basement operation" to a company serving a broad customer base in North America, Europe and Great Britain. Since its inception, Prescott continues to provide a service-oriented wide range of capabilities, while retaining the necessary flexibility for changing requirements. These include precision tooling, specialty operations, high quality standards and reliable deliveries at reasonable prices.

Prescott's "One Stop Shopping" concept is enhanced by offering engineering assistance to each and every customer. Prescott Module Company Ltd., has become a firm that recognizes all aspects and requirements of the Electronics Industry that need to be addressed today and in the future.

Prescott Module Company Ltd. has developed and refined a wide range of capabilities which include:

THERMOSETS

- Material** Diallyl Phthalate, Phenolic
- Description** Cases Molded with or without special features.
 Covers Molded with or without special features. Some molded with pins and/or inserts. Universal types available. Consistent and precise fit to their corresponding cases.
- Bobbins
 Lead Frames
- Specials** Specialty items with design assistance available.
- Shapes** Circular
 Rectangular
 Square
- Colors** Black or blue For Diallyl Phthalate
 Black For Phenolic

Refer to our standard THERMOSET CATALOGUE.

THERMOPLASTICS

- Material** Rynite, Valox, Gafite, Delrin, Ryton. . . .
- Description** Cases Molded with or without special features.
 Covers Molded with or without special features. Universal types available. Consistent and precise fit to their corresponding cases.
- Bobbins
 Connectors
- Specials** Specialty items with design assistance available.
- Shapes** Circular
 Rectangular
 Square
- Colors** Natural or Black
 Others available.

SPECIALTY OPERATIONS

- Operation** Sandblasting Dimpling
 Drilling Ultrasonic insertion
 Cutting & welding.
 Cut-outs
 Crimping

METALS

- Material** CRS, Aluminum, Copper, Brass. . . .
- Description** Cases Manufactured with or without special features.
 Covers Manufactured with or without special features. Consistent and precise fit to their corresponding cases.
- Shielding
 Fins
 End Caps
- Specials** Specialty items with design assistance available.
- Shapes** Circular
 Rectangular
 Square
- Finishes** Natural
 Pre-Tinned
 Others Available

LAMINATES

- Material** G-10. . . .
- Description** Covers Manufactured with or without special features.
 Bases/Carriers Manufactured with or without special features.
- Specials** Specialty items with design assistance available.
- Shapes** Circular
 Rectangular
 Square
- Colors** Natural or Black

CUSTOM TOOLING

- In-house Fabrication
 Precision
 Experienced Toolmakers
 Fully Equipped Facility
 EDM Equipment

Prescott's design capability eliminates the use of mold release agents.
